The U.S. forklift division based in Cleveland has a professional team knowledgeable in Sales, Purchasing, Marketing, Logistical and Technical Support.

Start-up of the lift truck business

Korea's initial home-based forklift market was an open-import enterprise. In the 1960's, Korea Machinery Co. Ltd. started to import assembled forklifts as part of a nationwide equipment expansion venture. Initial product sales of this industrial equipment focused on large business communities, the armed services and on state-run firms. This ultimately led to a merger with Daewoo Heavy Industries Ltd. In 1976, the Forklift Division begun business operations throughout Korea to overhaul and sell this heavy equipment. By 1978, a lift truck manufacturing plant was successfully completed. Continuous technical training grew to become the new focus for improving quality and product development.

Growth of Lift Truck Exports

Domestic forklift trade for Daewoo started in 1967 and grew to an amazing 90% market share in Korea. By the 1980's, Daewoo's advanced technological improvements combined with sales success placed them in a situation of considerable growth of their forklift business.

In 1981, Caterpillar Industrial Inc. of the United States, proposed a joint venture project to respond to competitive pressures in the US materials handling market. This project greatly expanded Daewoo's forklift sales. Construction was completed in 1984 to facilitate a new plant which helped set up the business for the manufacture of high added-value products suitable for export. In 1993, the company had a global sales system and started exporting models they had developed through in-house technology, as an independent product. Certifications were then acquired from CE of Europe, UL of the United States and ISO 14001 and ISO 9001, securing expansion opportunities into overseas marketplaces.
