

## **Counterbalance Forklift License Windsor**

Counterbalance Forklift License Windsor - When operated by completely trained operators, forklifts can become a major asset for firms and companies. We can offer your staff a comprehensive training program which covers all factors of operating a powered lift machine. Counterbalance forklift training offers forklift operators with the knowledge and practical skills considered necessary to efficiently and safely operate forklifts. The particular program offers a combination of classroom theory, participant observation and hands-on training in a warehouse-type setting. Training could be customized and/or on site.

The course comprises the fundamentals of powered lift trucks, like for instance rules and regulations, parts, load centres and factors affecting stability. General operating procedures are taught, like for example startup, circle check, forward/reverse on level ground, shutdown, and operating around other people. Load handling subject matters comprise selection of loads, load pickup and placements, loading and off-loading trailers and load security and integrity. Individuals participating would learn operational maintenance procedures, like for example refueling and recharging. Safety concerns in the workplace will be discussed. Participants will know the environmental conditions affecting the performance of the lift truck and be able to identify potential hazards. Advanced training on propane handling can be incorporated.

Both employees and employers can face severe penalties if national and industry rules are not followed in the operation of forklifts. Employees who operate a forklift or reach truck should be well-informed about the guidelines about their safe operation. Training is recommended for any individual applying for work that needs forklift operation.

We offer hands-on training and in-class theory inside personalized, small classes. Training choices include entry level or refresher courses.
